sales & delivery solutions

Stay in Touch from Wherever Your Business Takes You

That old adage 'Time is money' has never been truer. With Mobility Solutions from Advent you can stay in touch with your business from wherever your business takes you. Advent Mobility Solutions increase service levels, productivity, and profitability by using the latest breakthroughs in communications and Internet technologies.

ScanScope by Advent

ScanScope is Advent's complete mobility solution, incorporating 2 core modules, essential for any business:

1. Sales & Delivery Solution
2. Goods-In & Warehousing Solution

Sales & Delivery Solution

Remove the need for paper and streamline your whole goods delivery and invoicing processes through to payment receipt using Advent's Sales & Delivery Solutions.

Using our solution your drivers, whether sales or delivery, carry all the necessary goods delivery information for each customer on their handheld PC. Upon delivery, the invoice and/or delivery docket can be electronically prepared, signed by the customer and printed to a wireless printer. Changes to the delivery details can be made instantly.

Traceability: For perishable goods, batch numbers can be quickly recorded for traceability purposes and reports can be produced to clearly identify all products that may need a recall from customers.

Proof of Delivery: The customer can electronically sign the handheld device to record their acceptance of a delivery. The signature is time stamped and stored securely with the delivery information for full traceability.

The Benefits Include

No manual input of deliveries by office staff	Process all delivery data on same day
No more double entry of transactions	Complete accuracy
Reduced overheads	Capture and store customer signature
New products & prices available instantly	Increased driver productivity
Vehicle stock control	Eliminates driver mistakes
More professional customer service	Increased customer satisfaction & professional image
